Dear Sir:

In response to the Office Action mailed May 8, 2006, kindly enter the following remarks and amendments which are submitted to advance prosecution solely:

Serial No. 10/683,535

PATENT
Docket No. 58027-014000

In response to the Office Action mailed May 8, 2006, the following response is hereby offered for the Examiner's consideration.

Election / Restrictions Requirements

Applicants respectfully select the Examiner's group 1, namely Claims 1-11 drawn to what the Examiner classifies as "a method for identifying a genomic target of interest, classified in class 702, subclass 20," with the species defined as expression data from a mammal. It is respectfully proposed that this choice is responsive to the instant paper, however, in order to be fully responsive, applicants' undersigned representative offers the other and further remarks for the purpose of being compliant with the Examiner's ostensive position on 37 C.F.R. 1.141 which is not agreed with, but nonetheless responded to.

The remaining claims (12-14) are withdrawn, without prejudice and maintaining all divisional rights. Likewise, claims 2 and 4-7 and 9 have been withdrawn as set forth below.

One of Two Election of Species/One-2 Further election of Species/Two of Two etc...

Applicant respectfully selects claims 1, 3, 8 and 10 - 11, believed to be expression data from a mammal, and comprising at least one tyrosine receptor set.

Remarks begin on page 7. It is respectfully requested that this case is in a condition for allowance and such relief is hereby earnestly solicited.

A complete listing of the claims follows.
